MANAGEMENT AND TECHNOLOGY

What is HTML?

— HTML?

HTML is a markup language used by the browser to manipulate **text**, **images**, and other **content** and display it in the required format.

—HyperText Markup Language

01.

WHY

HTML?

IMPORTANCE OF HTML

1. Essential for Digital Content Creation
2. Important for Web Browsing & E-commerce

HTML ATTRIBUTES

HTML ATTRIBUTES

BUILDING BLOCKS

Just like a house is made up of bricks, HTML uses different building blocks called "**tags**."

These tags are like instructions that tell the computer how to organize and display information on a webpage.

HTML ATTRIBUTES

ORGANISATION

HTML helps organize everything so that it looks good on different devices, like your computer or a tablet.

It's like arranging furniture so that the house is comfortable for everyone.
